

GLOBAL MARKET INTELLIGENCE FOR ANY PROJECT.

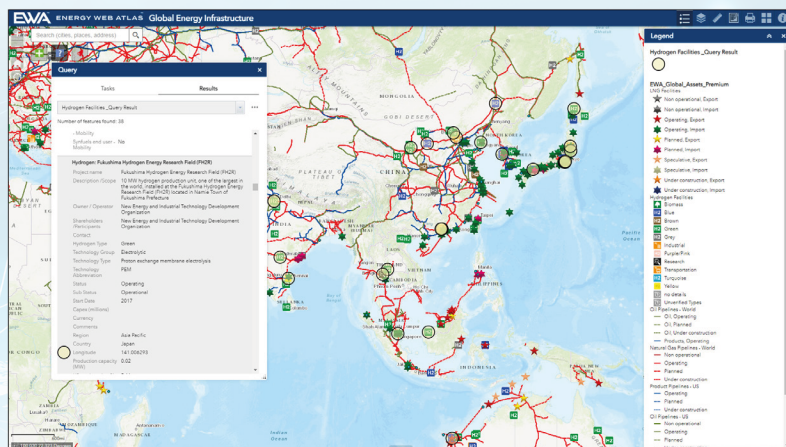

The Energy Web Atlas (EWA) delivers real-time market data, analysis and coverage of midstream infrastructure and downstream projects. As the most comprehensive tool in the market, EWA helps users find actionable project intelligence for the international energy industry.

ENABLING SUPERIOR BUSINESS DEVELOPMENT STRATEGY AND EXECUTION

EWA provides access to key global project details and contacts for Operating, Licensing, Construction and Engineering companies. This is the only fully integrated global intelligence platform for Liquid and Gas Pipelines, LNG, Gas Processing, Hydrogen, Refining and Petrochemical projects. Users can effectively pursue new business opportunities with greater market insight and the most current project intelligence.

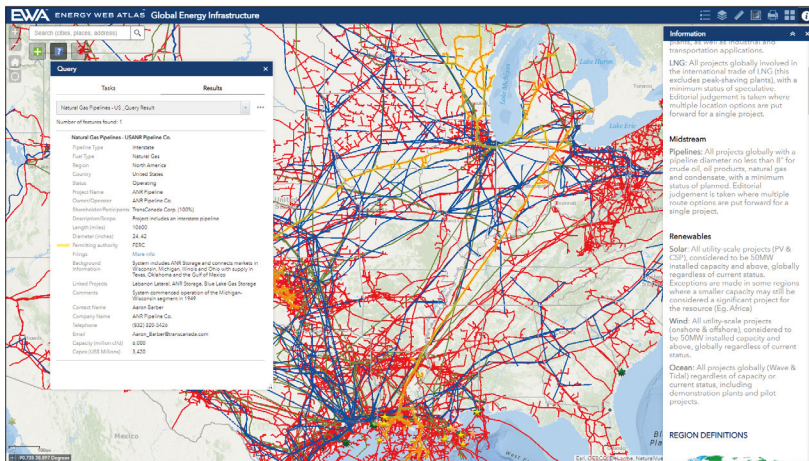

EWA is continuously updated to provide customers with the most current information, such as project start-up, status, capacity, investment, scope and process technology. Armed with this market data, customers are better able to make decisions in today's fast-paced market.

Customers can also gain access to Gulf Energy Information's wide range of proprietary media content and analysis to more comprehensively assess global macro-trends, risks and opportunities.

DATASET FEATURES

- Liquids and Gas Pipelines
- LNG
- Gas Processing
- Hydrogen
- Refining
- Petrochemical Projects
- Renewables

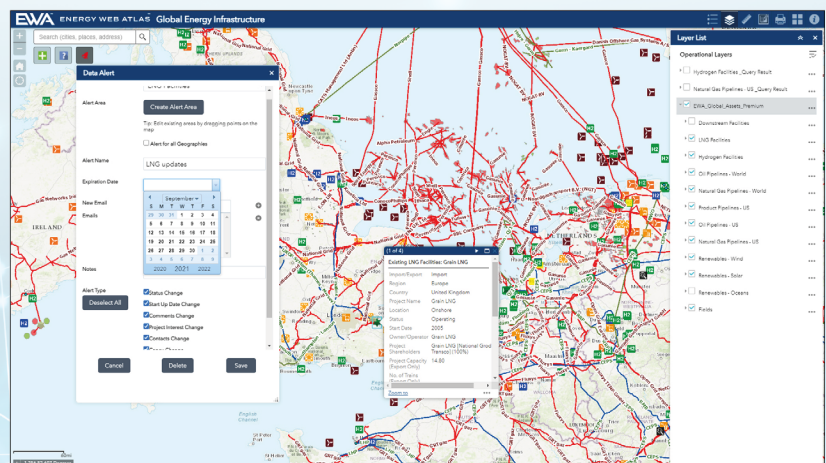

FACILITATING STRATEGIC PLANNING, ASSET OPTIMIZATION

EWA centralizes and streamlines the ingestion and integration of multiple datasets in a single geospatial platform, thus improving the efficiency of analysis and decision-making for all energy projects.

By visualizing existing, in development and proposed infrastructure, EWA enables users to formulate a data-based view of future supply/demand fundamentals, and associated pricing and differential impacts.

EWA provides companies with the ability to automate and standardize cross-departmental workflows and establish custom alerts to track project status changes or newly announced projects.
